

# Special flood coverage online

Recent news indicates there will be heavy flooding in southwest Montana, and as a result The Montana Standard has created a special "Flood Watch" section online dedicated to up-to-the-minute flood coverage.

The section includes local news, photos, video, weather forecast, breaking news and a flood warning map for Montana.

The Standard is also asking readers to submit breaking news tips and to share flood photos and videos online.

Flood Watch can be found online at [mtstandard.com/flood](http://mtstandard.com/flood)
